

Satellite radio is a premium service that I pay a fee for every month. I receive an excellent quality and variety of channels with this service. As an over the road truck driver, I utilize the service that is offered to me with my XM radio of the Instant Traffic and Weather Channels. These channels come to be a very important tool for information in my daily travels. I would like to urge the FCC to reject the NAB's petition 04-160 and support the XM's ability to provide this service to myself and others. Thank you for your time.
